

DISCOVER NEW OUTDOOR SOLUTIONS! **BioClimatic** pergola for a better living

Sun and rain protection in Biosshade style

Control your environment

shade and shelter options
for all seasons

THE ROTATING BLADES OPERATED BY MOTOR provide shade and sunlight control. The smooth tilt adjustment create natural ventilation and air circulation. The construction of pergola with built-in gutters and unique water drainage system ensures the perfect rain protection. The BioClimatic architecture helps to reduce the energy needs, regulates and maintains a comfortable temperature, along with maximising the use of natural light.

FOLLOW THE SUN WITH 170° BLADE ROTATION Motorised pergola powered by Somfy

solutions for your penthouse

European quality certificates

THE BIOCLIMATIC PERGOLA CONSISTS ONLY OF THE BEST MATERIALS: aluminium and stainless steel. The appropriate finishing gives it an excellent resistance to the weather conditions. Lack of corrosion means long life and low maintenance cost. Furthermore, Qualimarine standard proofs that the system will not lose its attributes in a sea environment and will keep its perfect look whatever the weather conditions are.
